ScrambleScoop — The Quicker Picker Upper scramblescoop.com

I've seen it happen on several occasions. You are playing in a golf scramble and in your effort to lean out of the cart and swoop up your golf ball, you tumble out head over heels. Not only that, you spilled your favorite beverage. The ScrambleScoop is being called the first-ever "drive-by" golf ball retriever. The ScrambleScoop allows you to literally "scoop" up grounded golf balls while in a moving cart. The mesh catch basket is set at an angle so that all you have to do is hold the shaft out and scoop away without leaning out of the cart. ScrambleScoop inventor Betty Bucher created the product to find a solution to that problem. "I knew there had to be a better way," she says. We found the ScrambleScoop effective in speeding up golf play, and handy for picking up things in the yard or in the house. And that's the poop on the scoop. (Ciattei)

Contigo AUTOSEAL Kangaroo Hydration Bottle — Gunga Din gocontigo.com

Hot, humid summer days on the golf course are usually some of the toughest to play. Your body loses energy, and unless you are replenishing it, your game suffers. The AUTOSEAL Kangaroo Hydration Bottle is a solid product with a twist. There's a compartment on the bottle to store keys, identification, credit cards and your cash. Any active person who frequents the links or the gym for a workout will love this. The company, Contigo, is one of the leaders in travel mugs and bottles, and they came up with this innovative product. The patented AUTOSEAL technology seals the lid, so spills and leaks are a thing of the past. It can be easily stored in your bag for walkers and fits quite handily in the cart cup holders. Talk about multi-tasking! (Ciattei)

The Arbor Collection Golf Towel — All About The Environment sirchristopherhatton.com

We are seeing more and more companies put forth effort to create or change products to fit our environmentally sensitive world. Sir Christopher Hatton, one of the world's leading suppliers of high quality custom woven towels, has unveiled The Arbor Collection, their first-ever eco-friendly golf towel line. Combining Birchwood and cotton fibers, this is one shiny, soft and functional towel. The fabric offers increased elasticity and quite frankly is better at cleaning your clubs and balls than a normal cotton towel. With these features and a commitment to the environment, golf clubs should look into getting them onboard in pro shops, and it would make an excellent goodie bag entry for outings. There's just no need to throw in the towel when it comes to ecology! (Ciattei)

Sanuk Fur Real Sandals — From One Smooth Green to Another www.sanuk.com

The Golf Guide enjoys reviewing new products for our readers. It's not often that the day we try out a new product, someone out of the crowd comes up and says, "Are those Sanuks! I have a pair . . . most comfortable shoes I have." True story! But let me correct him. Sanuk makes sandals, NOT shoes. And oh yes, they are comfy. My feet gave me a big "toe-up" after a long, hot day in my spikes on the course. Sanuk's "Fur Real" sandals are not to be confused with a well-manicured fairway. The sandals are covered in a super-thick-pile carpet to cushion your every step. Obviously these are not only great for post game wear but are perfect for the beach vacation or backyard BBQ. Sanuk's Fur Real or other sandals are all visible on their website. I just love it when my feet are happy. And this little piggy went. . . (Ciattei)
